Welcome to our Eighth Annual Bull and Female Sale!

We are committed to being a reliable source for some of the most well-balanced Limousin and LimFlex seedstock you can source.

B – Bar Cattle is going on its fourth generation of being family owned and operated on the home quarter. We do the vast majority of our daily work, this includes clipping, picturing, videoing and putting the content together for the sale book. This gives us the chance and time to really analyze each individual animal in the flesh and on paper. It is very rewarding to see the overall balance and consistency in this offering from their overall conformation, their actual data and their projected data!

The herdsire prospects are a diverse group. Sixteen purebred bulls are made up of three of our walking herdsires; the first sons off Rainmaker 4K and Kingsman 5K followed up with sons of Henry 32H. Our Limflex offering is larger with fourteen (three red and eleven black) herdsire prospects. All are off AI sires from reputable operations within the Angus breed. Whether you want heifer bulls, cow bulls, black or red there is something available.

Once again, we are offering two picks of the partnership heifer calves. These seven heifers are a very intriguing and high-quality group. Some would go on to show at a high level, but most importantly they are all bred to be productive functional cows.

The six bred heifers are a red, homozygous polled, uniform group. They are mated to proven, marketable, homozygous polled AI sires; Hunt Credentials 37C ET or B-Bar Carhartt 71H to help give the new buyer a quick ROI.

The frozen genetics side of the sale is a bit smaller this year, but the quality is high and exclusive to just a few breeders. We anxiously await our first Kingpin 2001K progeny this winter. Kingsman 5K was put to the test between ourselves, Andrews and Greenwood's breeding programs, although it is still early, I think it is safe to say the Kingsman 5K calves have a lot of quality and future.

We provide a lot of information and data to aid in your selection process. Use what is useful to you and what you prefer. If you have any questions, concerns or comments please contact ourselves or any of our trusted sales staff. We want to make sure you end up with the right animal or genetic package for your program. Our sales staff are very knowledgeable with our program and sale offering and we urge you to contact them if you have any questions.

We hope to see you Tuesday, December 17th at the Farm for our Eighth Annual Bull & Female Sale!

Terms and Conditions

Cattle will sell according to the Terms and Conditions of the Canadian Limousin Association

Welcome to the 8th Annual B-Bar Cattle Co. Bull & Female Sale.

As you study this catalog, you will have to agree that the depth of the offering is synonymous with the consistent quality offered from the B-Bar program over the past years. Eric's knowledge of pedigrees, historic data and current information, is a benefit to his customers.

The red purebred division is highlighted by two of the most popular sire groups in the Limousin industry. Be one of the first to purchase progeny from breed leading Rainmaker & Kingsman bulls. Both of these sires are two of the most popular, correct & dynamic bulls to have come along in recent years.

B-Bar brings to the sale offering the "best" and largest selection of red & black LimFlex genetics ever offered in Canada. There is amazing depth of quality throughout this division.

The B-Bar "heifer pick x 2" is one of the most exciting events on the Limousin calendar for 2024. And again this year the Boons offer a premium bred heifer section.

The Bohrson Marketing team hope you are able to take in the great hospitality from B-Bar. It is one of the absolute must attend events in the Limousin community. Please reach out to Scott, Martin, Taylor or Jaxon to visit with us about this set of cattle.

Best regard,

The Bohrson Marketing Team

We are excited to be part of this year's B-Bar Cattle Bull & Female Sale, collaborating once again with the Boon family for their 8th annual event.

The Boon family has mastered the art of blending U.S. and Canadian bloodlines, and this year's offerings showcase genetics that truly speak for themselves. With a loyal customer base of both commercial cattlemen and dedicated seedstock producers, the Boons remain focused on delivering exceptional Limousin and Lim-Flex seedstock that meets the diverse needs of their clients.

The family's journey in the Limousin breed began in 1982 when Delaney made his first industry purchases. Their commitment extends beyond breeding; they actively participate in various associations at local, provincial, and national levels. This involvement has enriched their understanding of the industry, resulting in a consistently impressive cow base and high-quality cattle in each annual sale.

Their dedication to breeding structurally sound and visually appealing cattle is evident in the numerous champions they've showcased at major livestock events across the continent. They also regularly consign elite Limousin herd sires, top-quality females, and exceptional show heifers to the most prestigious sales nationwide.

On behalf of the entire Boon family and the B-Bar Cattle team, we warmly invite you to their farm in Lucky Lake, Saskatchewan, on Tuesday, December 17th. This collection of Limousin herd sire prospects and females is truly outstanding and has the potential to elevate your program significantly. If you cannot attend, we would be pleased to handle your inquiries confidentially and professionally.

Please feel free to reach out to us or any member of the sales team with any questions about this exceptional set of Limousin and Lim-Flex genetics.

We look forward to assisting you in securing cattle from one of the leading families in the Limousin business today.

Best regards,
Kiley McKinna

No online bidding. Sale will be streamed on our facebook page to view only.

Cattle are available for viewing at the farm anytime.

Payment on Bulls:

50% down Sale Day

50% after a successful semen test

Insurance on Bulls

All bulls going back to B Bar Cattle must be insured. An Insurance Broker will be onsite for your convenience.

This protects both parties involved.

If a bull is not insured and sustains an injury or dies before delivery the buyer is still responsible for paying for the bull in full.

Wintering & Bull Development

- We insist to winter the bulls for you, the buyer, **at no additional cost**. This will allow us to properly develop them on a balanced ration as we prepare to semen test them and for longevity in mind to benefit you, the customer.
- We work closely with BeefSmart to test our feed and formulate our rations.
- We feed a high roughage TMR ration formulated by BeefSmart .

Breeding Soundness Evaluation

- We will semen test the bulls at B Bar Cattle's cost, approx. March 1st.

Semen Collection and Semen Interest

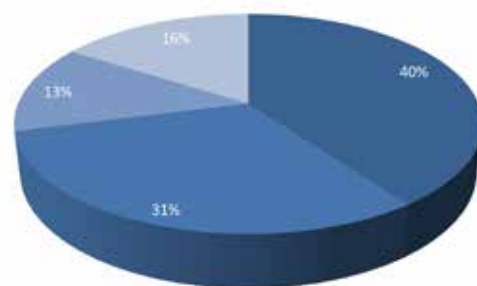

- B Bar sells all bulls in their entirety unless otherwise stated.
- B Bar Cattle reserves the right to collect semen on any bull sold through this sale.
 - The semen collection will be at B Bar Cattle's expense and the buyer's convenience.
 - Any semen collected will be for B Bar Cattle's in herd use only.
 - This includes the right for B Bar Cattle to use this semen on any partnership females
 - Bulls offered with partners
 - Partners reserve the right for in-herd semen at their expense and buyers' convenience
 - Partners also have the right to use semen on any partnership females

Act	279	U	95	804							

Triumph 60M has stood out consistently from a young age. Everyone has gravitated towards him on pasture and at home since weaning. He has that herd bull demeanour, long and level build with rib and muscle shape. On paper he ranks in the top 40% or better for 15 of 16 traits. His actual data helps support those EPD's with a modest birthweight, short gestation and weaning index of 113. Some of our favourite females are the Credentials 37C daughters and 27H is no exception. In just a short period of time she has proven her worth, giving us sons that are moderate birthweight and then indexing high for growth and carcass traits. Triumph 60M is the complete package!

Act					

This lighter colored red bull is one of four homozygous polled Rainmaker sons that we have on offer. He has that extra length, frame and muscle mass. Dire Straits mom, 203H is a big ribbed, good footed, beautiful uddered young cow that weaned 72M off to index 111 which ranked him 2nd in his contemporary of 20.

Recommended for heifers. We feel 50M will work in the heifer pen with his actual numbers, projected numbers, cow family history and his overall build. You get drawn to this good haired, docile bull with his cherry red color. We ran out of time to get a picture of 62H milking, but her udder is high quality and she remains long and level and attractive like her yearling picture shows.

Act	283	U	103	761							

Sometimes mating genetics can just baffle you and the birthweight on 23M is one of these times. 57E's five previous calves have ranged from 80lbs to 87lbs. We had 24 calves (8 heifers and 16 bulls) off Kingsman 5K and averaged 84lbs. Regardless of a larger than expected birthweight on Rolling Stones 23M he developed into a strong sale feature this year. He has the depth of rib and muscle mass to fill his frame in an impressive herd bull look. With his balanced set of EPD's, actual numbers, and cow family history, this Kingsman 5K son should not be overlooked! **Maternal sister sells as Lot 31.**

A consistent set of flush brothers that have a unique pedigree, cow power, and real-world fundamentals. They are a soggy group. They have length of body, get out and move freely and are heavy haired. Their dam, 6J, is an absolute favourite around here with her easy-going nature, attractive design, bold rib shape and near perfect udder quality. 6J is from the tremendous and dominant flush of 13 we had in 2021 from the Warhawk x Shameless (aka Sammy). That flush produced the Champion and Reserve Champion Bulls at the 2021 National Limousin Show at Agribition, along with the Senior Heifer Calf Champion, 16J, who topped the Solid Gold sale at \$22,000 to Lisle Livestock. Do you homework on these four, there is a lot of quality and maternal power backing them!

Maternal brother sells as Lot 16

Recommended for Heifers. Rush 15M has the credentials to work in the heifer pen with his 77lbs BW, 283 gestation and the structure of his head and shoulder. His four year old dam is a big barreled, near perfect uddered female who has put all three calves into this Annual sale.

Maternal sister sells as Lot 32.

A docile, heavy haired Kingsman son that we gravitate towards for his overall balance. He has muscle, softness, and length in a sound eye appealing package. On paper he is very well balanced. His actual data is strong and his projected numbers have ranked above average in 14 of 16 traits. His dam, 43F, is a productive Bubba Watson female that milks heavily, as evident by her weaning ratio of 106 on 5 calves.

Coldplay 67M has consistently been on our radar from a young age. This docile bull is well balanced in his overall look and does not go to any extremes. He puts it all into a very attractive masculine look. He is balanced in his EPD's and sports a weaning ratio of 104. His dam was the black sheep of the four Sammy flush mate heifers due to the fact we lost her recip when she was 3 months old, but that has not affected her production as she has a weaning ratio of 109 on her first two calves. Her first effort was the \$17,500 Pharoah 13L bull that was a part of our Peoples Choice and Champion Limousin Pen at CWA who was sold to Diamond V Ranch in North Dakota.

Recommended for heifers. The youngest bull in the offering, but you wouldn't know it when you walk through the pen. He combines calving ease with growth and maternal traits. Moderate in his frame, good haired, docile, with muscle and softness. He is the natural calf off of the 6J donor, a cow that is heavily favoured here for her docility, soundness, ease of fleshing and udder quality.

Maternal brothers sell as Lot 8, 9, 10, 11

A pair of flush mates that have been exciting to watch develop right from the beginning. They combine calving ease, growth and maternal attributes into an impressive looking package. We like their herd bull demeanour, sound structure, scrotal development and overall complete phenotype. We lost their donor dam too soon, but she was elegant in her design, big ribbed and heavy milking. We incorporated Greenwood Four Mile 47J into our LimFlex program for his balance of all relative traits and his impressive and highly regarded donor dam. The flush to the Nicole 13H cow really clicked, with the two bulls and two females being very consistent and standouts within their contemporaries. These two individuals were going to be a part of our pen of 3 when we had intentions of going back to The Yards at CWA.

A pair of flush brothers that are loaded with power in pedigree and phenotype. They are consistently thick, heavy-muscled, power bulls with extra size that will sire calves that weigh up. The donor dam, 66J, is rich in maternal power on both sides of her pedigree with powerhouse cows like Wisteria Lane, Young & Restless, and Farewell. 66J was a feature female in the 2022 Western Select and has grown into a powerful, sound made female with real cowy attributes. Riley thought highly of her after she calved as a two year old to go and flush her. You can not argue with the results when he mated her to Brooking Emerald 9179.

Act	275	U	83	692							

Donor cow in the making here! Nicole 30M is big ribbed, square on all fours, great teat placement, with a real cowy look. She is equally impressive on paper as she is in the flesh. We have six maternal sisters in production and this is the first daughter off of the 9E donor to sell strictly because she is a partnership female. We had sexed female semen on the Stark 67G bull from Wheelers and Six Mile and wanted to make sure we got another female off 9E, even though I knew in the back of my head she would be offered for sale. A LimFlex female with a big future ahead of her!

Lot 30b and 30c are ¾ sisters and then a bit more as they both go back to the 115U donor on the maternal side further down the line. 38M is a stout, soggy, powerhouse that still gives you a nice attractive look. We thought so highly of this Rainmaker mating to Foxtrot 68H that we flushed her that way and bred her back the same way and will have seven full siblings to Lot 30b coming in 2025.

Maternal sister sells as Lot 33.

Pick of 7 PARTNERSHIP HEIFER CALVES

30d

This one gets noticed by everyone that tours through and rightfully so! She is tremendously long, bold in her rib shape, great in her hind leg structure and elegant in her front end. The mating between Fugitive and 105C is no fluke as the full sister to 17M was the high selling lot and first pick of the partnership heifer calves last year to Crown Hill Acres and Venture Livestock. 17M has a great disposition for a junior to take hold of her then let her develop into a front pasture cow after that!

A real cow prospect in the making. Foxtrot 1M is long spined, level out of her top and deep bodied. She will turn into a productive cow with the maternal cow power backing her. She carries a balanced set of EPD's, unique pedigree to provide a lot of options when you breed her.

Here is one that gives you a great look in a hairy, deep bodied, square hipped package. Her dam Cristy 23C won Agribition in 2017 as a two-year old. Her granddam Zena was campaigned successfully in 2018 being the Champion Female at Stockade Round-Up and Reserve Champion Female at Farm Fair and Agribition. There is power in the blood in this one!

Andy 46M would make a great junior project with her easy-going attitude, great hair coat and overall style. Give her some time to develop and she will turn into a real nice female with her maternal look and strong teat placement. The combination of big powerful maternal cows in her pedigree and impressive EPD's will allow for a lot of versatility while mating her down the road.

Karisma 44L is a fault free type of heifer with dimension, width and style. She is setting up a nice udder and if she follows in her sister's footsteps, she will be an exciting cow to have in production. Her dam is a big volume cow that never misses with two bulls to breeder herds and three females that have all made it to replacement or into production. The service to the \$20,000 Carhartt will provide a quick ROI.

Starburst 38L is a very intriguing heifer with her look, udder development and completeness. Her genetics and numbers allow for lots of variety to breed her to in the future. Her dam, Starburst 56H's first effort was a \$10,000 son to Pine Creek Limousin and L&S Limousin in our 2022 Sale. The mating to the proven Credentials 37C adds to the predictability.

Terra and I have always had a soft spot for this one. We love her balance, structure and her overall fault free phenotype. On paper she is awfully nice with her balanced numbers which are backed up by her actual ones. We thought enough of her dam that we went and flushed her this spring. Foxtrot 86L has all the right tools to be a valuable breeding piece. The late January service to Credentials 37C should prove to be profitable!

Lot 34 has a maternal, cowy look with softness of rib, square hip design and sound structure. She carries a very balanced set of EPD's that will allow for many breeding options. We feel the New Life Henry females are going to make tremendous females and 102L should be no exception. The breeding to Carhartt 71H should compliment Urban Girl 102L very well with stoutness and muscle pattern.

Our search for a black bull took us to the long standing operation of Peterson's L7 Bar Limousin in South Dakota. L7 Kingpin 2001K was on my shortlist after talking with Cade and studying the bull on paper. Once I saw him and his dam in the flesh I called Terra and told her I found the one we need. He was so impressive in his muscle mass, structural build, foot quality, length of body and that proud masculine herdbull front end as he floated around the pen. His 14 year old dam is efficient, functional and structurally sound and looks good doing it. His sire is arguably one of the most popular genetic lines in the US right now and one that we admire for performance, foot quality, docility and scrotal development. We were able to team up with our friends in Wisconsin, Shy Hawk Limousin, and purchased him as the high selling lot in L7's 45th Annual Production Sale. Rocky and Debbie Payne scooped up all 20 doses in our sale last year and shortly after we sold them a semen interest in Kingpin.

The \$20,000 Diamond C Kingsman 5K brings a lot of traits and quality to the table. Phenotypically he has a masculine front end with a smooth shoulder that blends seamlessly into his fore rib. He is extremely soft sided with a square hip design and big scrotal. Numerically, he has a very balanced set of EPD's, with 13 traits ranking above average. His actual data has him at a 90lbs birthweight, a weaning weight ratio of 106 and a yearling weight ratio of 105. He is very intriguing genetically, with a twist to his pedigree that should allow many programs to utilize him. The maternal power in Kingsman 5K could be the most interesting part to him as his Dam and Grandam are efficient and functional cows with sound udders. The paternal sisters are gorgeous uddered females with tremendous structure. Be sure to consider Kingsman 5K as your next A.I. sire!
